

Instruction for 1win converter

1. Loading and installing the converter

- Download and install the converter.
- First of all, we need to configure the converter so that it always runs by default with administrator rights.
- Right-click the 1win converter shortcut.
- Select Properties.
- Then, in the window that opens, select the Compatibility tab.
- Check Run this program as administrator.

Starting the converter and setting it up for the first time

1. Start the converter.
2. Now you need to put 2 auto-import folders in the converter

- Import directory, here you point the way where the room keeps hands
To do this folder you need:

Waiting list Open

- Export directory, here you indicate the path where the hands converted to the desired format will be saved (create the path as indicated in the screenshot).

3. Further additional settings (optional)

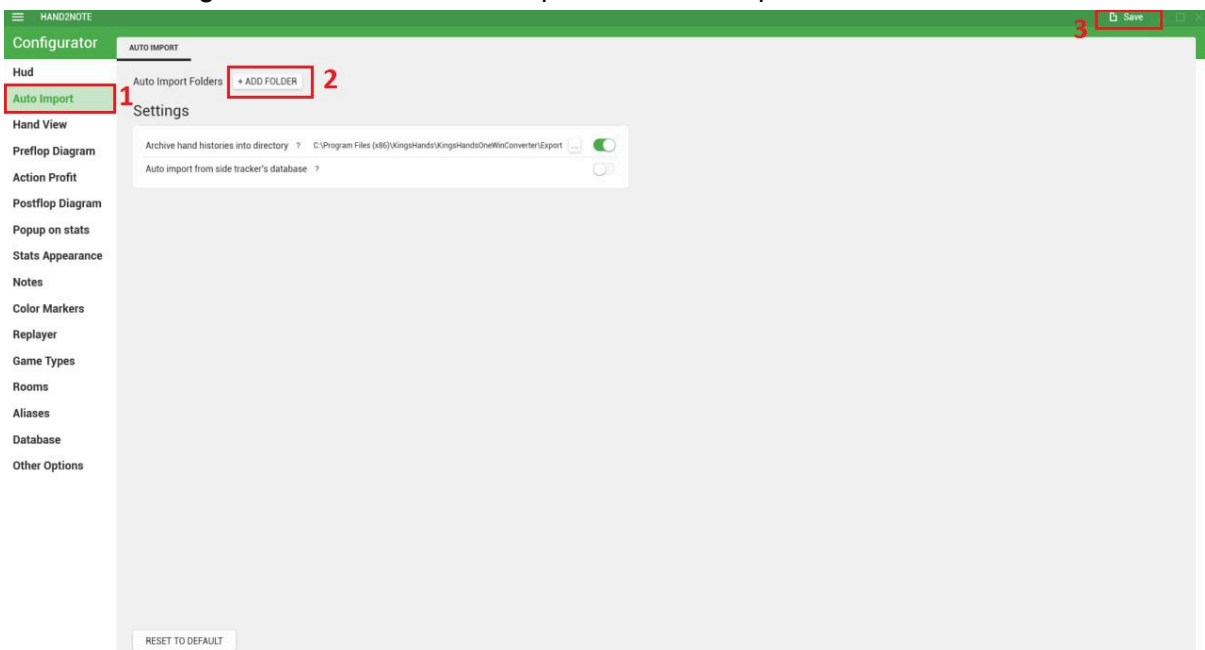

- Add room name prefix to table names - adds the name of the room in the hand near the table name.
- Add players names suffix - adds any word (number) to the players' nicknames that you set.
- Converting format PLO5/6 to PLO4 - all hands of game types such as PLO5/6 will be converted to 4 card Omaha.
- Output Format - here you select PokerStars.

Compatibility settings with trackers HM3, PT4, H2N3/4

4. For compatibility with trackers, you only need to place the folder from the Export directory converter section into the tracker itself.

H2N3/4:

Go to the settings and then to the Auto import section and put the folder and click save:

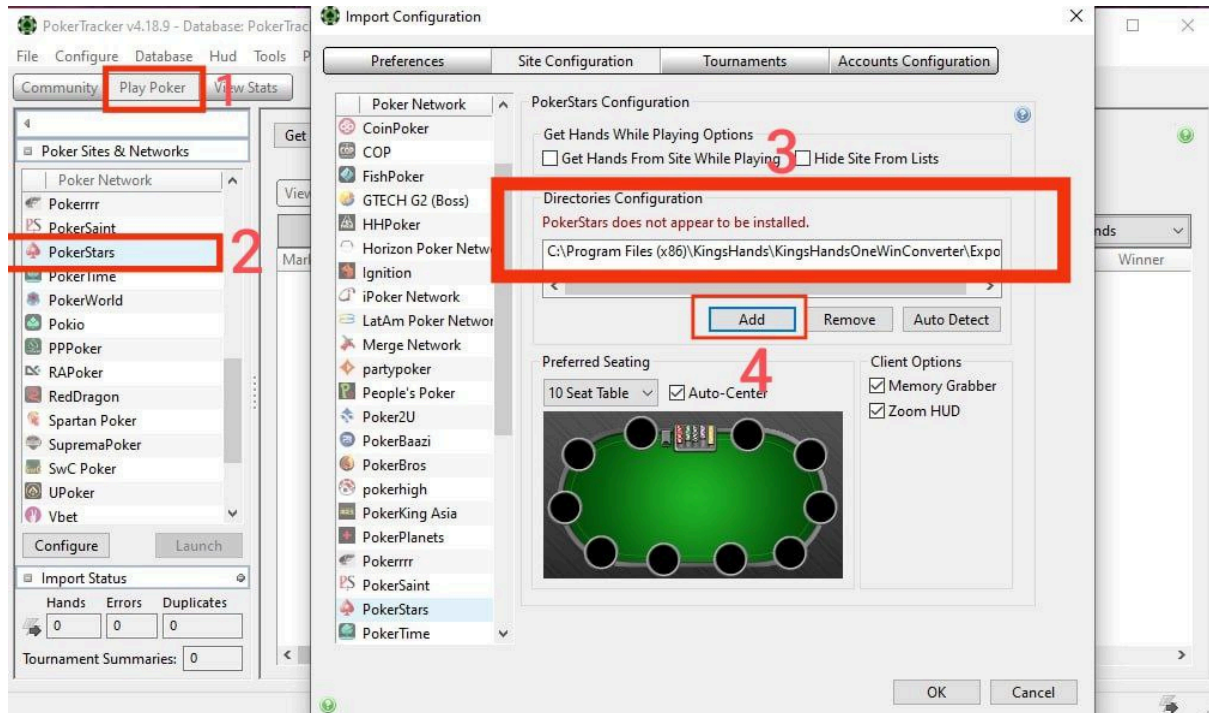

Also supports version 4, you need to do the same.

PT4:

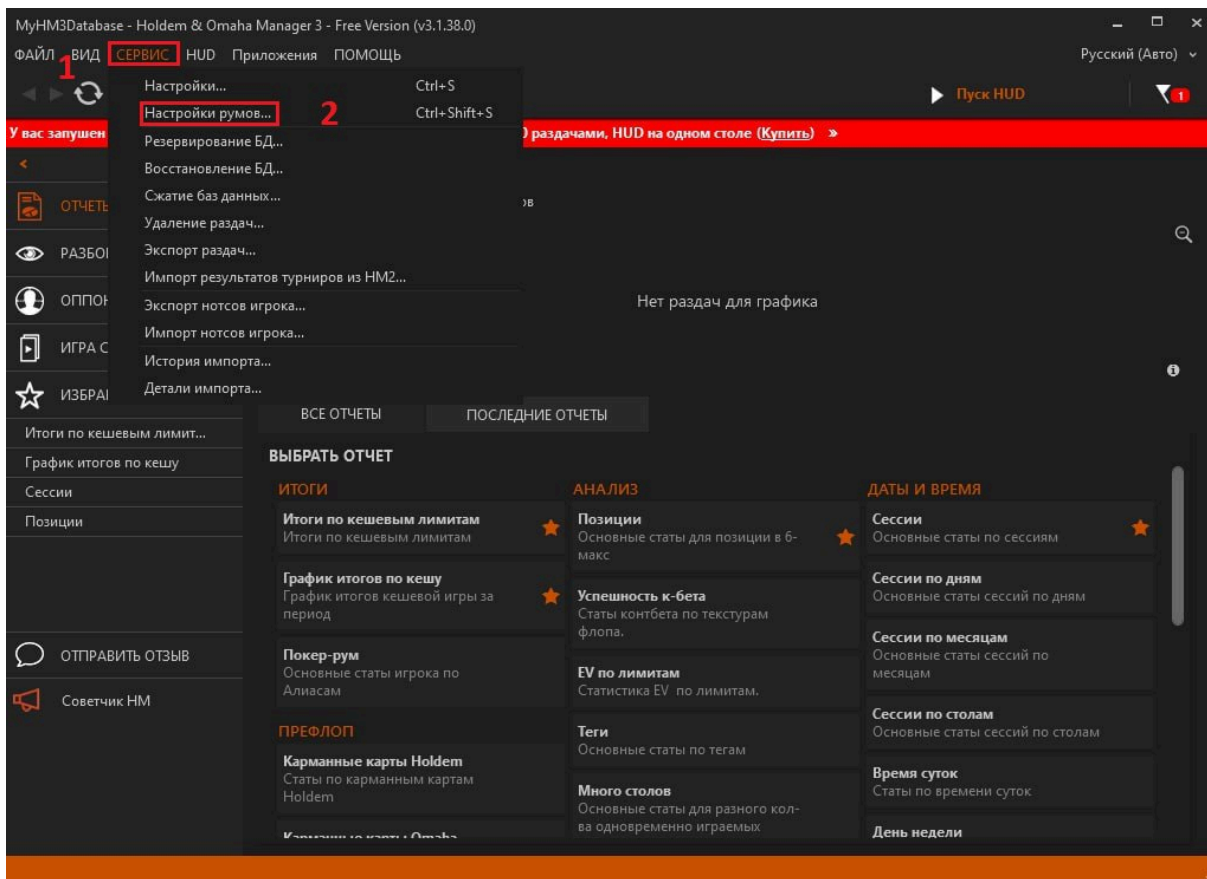

Go to Play Poker and select the PokerStars room, then click on the room twice and in the

window that opens, add a folder and click Add:

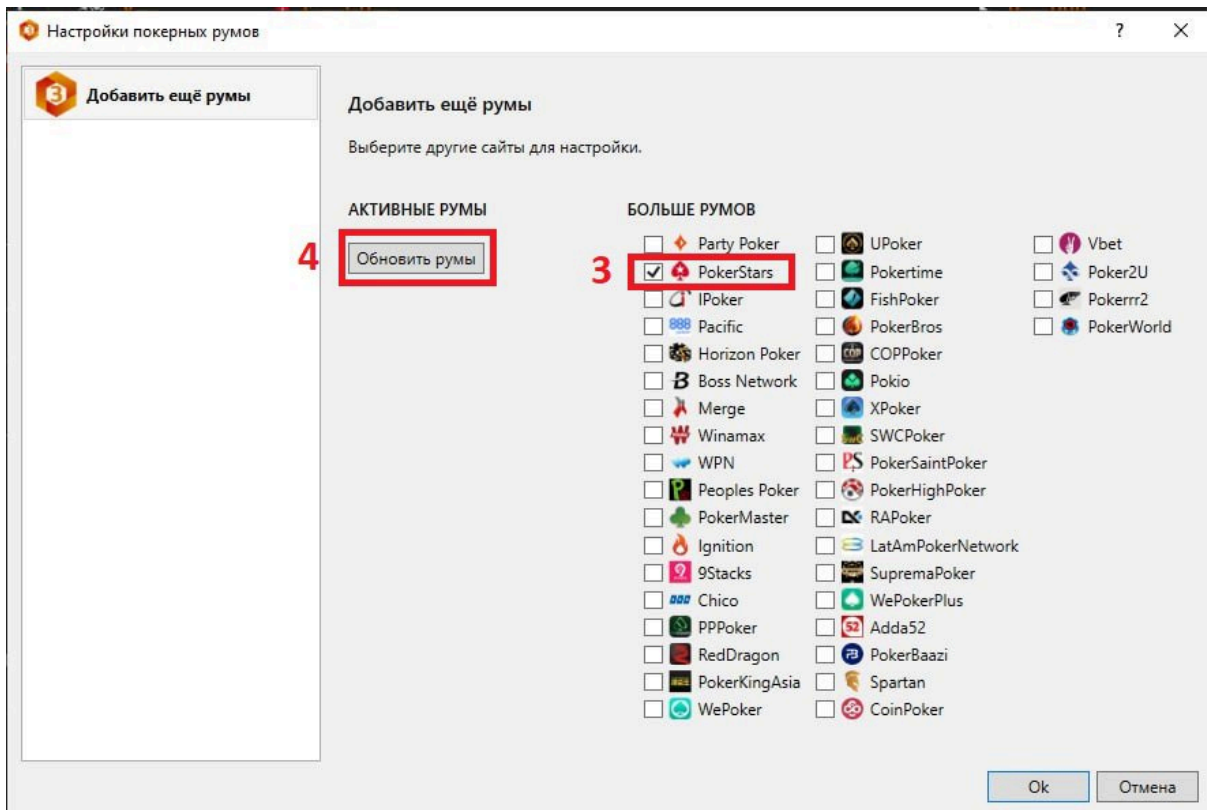

HM3:

1. Open the service section and press the room settings

2. In the window that opens, select the PokerStars room and click Update rooms

3. Now in the frame that appears, click Add and specify the path:
