

Instruction for LuckyBun converter

1. Loading and installing the converter ●

Download and install the converter.

- First of all, we need to configure the converter so that it always runs by default with administrator rights.
- Right-click the LuckyBun converter shortcut.
- Select Properties.
- Then, in the window that opens, select the Compatibility tab.
- Check Run this program as administrator.

Starting the converter and setting it up for the first time

1. Launch the converter.
2. The converter automatically specifies the path where the room saves hands; there's no need to change it.
3. In the converter window, click the browser button.

Google Chrome:

The extensions page will open.

Enable developer mode (top right)

Developer mode

Click "Load unpacked extension" (top left)

Select the converter folder

Yandex: -----

5. Make sure pop-up blockers aren't interfering with the extension's operation.

6. Launch the following programs: Poker Client – Converter – Click Start

Compatibility settings with trackers HM3, PT4, H2N3/4

For compatibility with trackers, you only need to place the folder from the Export directory converter section into the tracker itself.

H2N3/4:

Go to the settings and then to the Auto import section and put the folder and click save:

It also supports version 4, so the steps are the same.

PT4:

Go to Play Poker and select the PokerStars room. Double-click on the room, and in the window that opens, add a folder and click Add:

HM3:

1.

Open the service section and press the room settings

2. In the window that opens, select the PokerStars room and click Update rooms

3. Now in the frame that appears, click Add and specify the path:
